

Sprint #3 Report

EasyRoute

May 21, 2024

Actions to stop doing:

- implementing React

Actions to start doing:

- merge branches
- get accessibility data of buildings

Actions to keep doing:

- frequent communication between team members
- communicate git pushes
- research
- refine the api we are using make sure we have a good understand of customization later

Work completed/not completed:

- Completed:
 - user story 1: toggle switch to avoid stairs (already converted to plain JS)
 - user story 2: customize route to avoid hills
 - user story 4: search bar
 - user story 6: more informative map (legend), improve performance
 - user story 7: display turn-by-turn directions of a route (already converted to plain JS)
- Not completed:
 - user story 3: show locations of elevators in buildings (we decided to push it back to Sprint 4)
 - user story 5: allow users to customize travel mode for a route (walking, biking, driving, etc.)

Work completion rate: 75%
